15. Choose Finish. The screen below will appear.

Note that you need to start the program by choosing START or by using shortcut key combination CTRL+F2.

Under Click Interval you can modify the setting for the delay between putting your mouse and a button and the mouse click.

3. **Activate AutoClicker**
You need to activate AutoClicker each time you want to use it.

Open AutoClicker by double clicking the icon in the right lower part of your screen (next to the time display):
Choose **START**

Alternatively Use the shortcut keys, See **Click Hotkey** in the screen shot above.
